HARBORS AND RIVERS—CONTRACT WORK.			
Toward the construction of works on harbors and rivers, under contract and otherwise, and within the limits authorized by law, including horse-drawn and motor-propelled passenger-carrying vehicles required and to be used only for official business, namely:			
For works authorized by the river and harbor act of 1916, as follows:			
Hudson River, N. Y.—			
For continuing improvement, in completion of contract authorization (*acts July 27, 1916, vol. 39, p. 393, sec. 1; June 12, 1917, vol. 40, p. 136, sec. 1*)		235,000.00	
Willapa River and Harbor, Wash.—

Total for harbors and rivers under continuing contracts		10,982,950.00	7,052,700.00
NOTE.—The foregoing estimates, amounting to $10,682,950, are for works which Congress has provided may be carried on under the continuing-contract system. The sundry civil act approved June 4, 1897, provides that "Hereafter the Secretary of War shall annually submit estimates in detail for river and harbor improvements required for the ensuing fiscal year to the Secretary of the Treasury, to be included and carried into the sum total of the Book of Estimates." It is the view of the President that under that statute it is the duty of the department not to recommend projects or expenditures, but to give the Congress detailed information as to the sums which it would be necessary to expend if the projects already authorized are to be carried forward without loss or delay. In accordance with that view the above estimates for the respective works for the fiscal year ending June 30, 1922, are submitted under two heads, namely, for works which Congress has provided may be carried on under the continuing-contract system and for projects that have been adopted by Congress for which appropriations will be required for their prosecution, completion, or maintenance if they are to be carried forward without loss or delay.			
Total for rivers and harbors (including continuing-contract works)		68,097,865.00	19,452,700.00
Total, Public Works under War Department, exclusive of Military Academy		185,134,928.33	41,407,933.67

Except in cases of emergency, or conditions arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress, and except for those employed in connection with the construction of permanent quarters, offices, and other necessary buildings, dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies, and except for the permanent operating organization under which the compensation of the various positions is limited by section 4 of the Panama Canal act, there shall not be employed at any time during the fiscal year 1922 under any of the foregoing appropriations for the Panama Canal, any greater number of persons than are specified in the notes submitted, respectively, in connection with the estimates for each of said appropriations in the annual Book of Estimates for said year, nor shall there be paid to any such person during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on July 1, 1920; and all employments made or compensation increased because of emergencies or conditions so arising shall be specifically set forth, with the reasons therefor, by the governor in his report for the fiscal year 1922.

In addition to the foregoing sums there is appropriated, for the fiscal year 1922 for expenditures and reinvestment under the several heads of appropriation aforesaid without being covered into the Treasury of the United States, all moneys received by the Panama Canal from services rendered or materials and supplies furnished to the United States, the Panama Railroad Company, the Canal Zone government, or to their employees, respectively, or to the Panama Government, from hotel and hospital supplies and services; from rentals, wharfage, and like service; from labor, materials, and supplies and other services furnished to vessels other than those passing through the canal, and to others unable to obtain the same elsewhere; from the sale of scrap and other by-products of manufacturing and shop operations; from the sale of obsolete and unserviceable materials, supplies, and equipment purchased or acquired for the operation, maintenance, protection, sanitation, and government of the canal and Canal Zone; and any net profits accruing from such business to the Panama Canal shall annually be covered into the Treasury of the United States.

In addition there is appropriated for the operation, maintenance, and extension of water works, sewers, and pavements in the cities of Panama and Colon, during the fiscal year 1922, the necessary portions of such sums as shall be paid as water rentals or directly by the Government of Panama for such expenses (*act June 5, 1920, vol. 41, p. 945, sec. 1*).

Under the provisions of this act no greater sum shall be expended, nor shall the United States be obligated to expend, during the fiscal year 1922, on any reclamation project appropriated for herein, an amount in excess of the sum herein appropriated therefor, nor shall the whole expenditures or obligations incurred for all of such projects for the fiscal year 1922 exceed the whole amount in the "reclamation fund" for that fiscal year.

Ten per cent of the foregoing amounts shall be available interchangeably for expenditures on the reclamation projects named, but no more than 10 per cent shall be added to the amount appropriated for any one of said projects.

All moneys hereafter received from any State, municipality, corporation, association, firm, or individual for investigations, surveys, construction work, or any other development work incident thereto involving operations similar to those provided for by the reclamation law shall be covered into the reclamation fund and shall be available for expenditure for the purposes for which contributed in like manner as if said sums had been specifically appropriated for said purposes.

Reimbursement may be made to the United States by the former owner of land heretofore or hereafter acquired under the reclamation law, to the extent of the amount paid therefor, with a reasonable deduction for damage to the land or for the use thereof if any use is advisable and if the Secretary of the Interior shall find that the whole or any portion of the land is not needed under the provisions of the reclamation law; and the Secretary of the Interior may reconvey title thereto under such terms and conditions as he deems proper.

Additional Hospital and Out-Patient Dispensary Facilities for Patients—

For additional hospital and out-patient dispensary facilities for patients of the Bureau of War Risk Insurance, of the Federal Board for Vocational Education, Division of Rehabilitation, and other persons entitled by law to treatment by the Public Health Service:

That the Secretary of the Treasury is hereby authorized to provide additional hospital and out-patient dispensary facilities for patients of the Bureau of War Risk Insurance, of the Federal Board for Vocational Education, Division of Rehabilitation, and other persons entitled by law to treatment by the Public Health Service: (1) By purchase, gift, or lease of existing plants or parts of plants: (2) by construction on sites now owned by the Government or on sites acquired by purchase, condemnation, gift, or otherwise; or (3) by such remodeling or extension of existing plants and their equipment, owned or acquired by the United States, as may be necessary economically to adapt such plants to the uses and purposes herein provided, such hospitals and out-patient dispensary facilities to be located at such places as the Secretary of the Treasury may deem necessary for the best interest of the Government, and to include the necessary buildings with their appropriate mechanical equipment and approach work, including roads and trackage facilities leading thereto, for the accommodation of patients, officers, nurses, and attending personnel, and for storage, laundries, vehicles, and live stock, and including necessary furniture, equipment, and accessories. The Secretary of the Treasury is hereby authorized to accept gifts or donations for any of the purposes named in this appropriation.

That the Secretary of the Treasury in securing sites herein provided for may request the Secretary of any other department of the Government to transfer to the Treasury Department such lands or parts of land under his control, not required for other purposes, as may be found suitable for this use, and other departments are authorized to make such transfers to the Treasury Department as may be deemed to be in the interest of the Government.

That in carrying the foregoing authorizations into effect, all new construction work herein authorized shall, as far as feasible, be of fire resisting character, and the Secretary of the Treasury is authorized to enter into contracts for the construction, equipment, etc., to purchase materials in the open market, or otherwise, and to employ laborers and mechanics for the construction of such buildings and their equipment as in his judgment shall best meet the public exigencies.

That the Secretary of the Treasury is hereby authorized in his discretion to employ for service within or without the District of Columbia and to pay from the sums hereinafter authorized for construction purposes, at customary rates of compensation, exclusively to aid in the preparation of the plans and specifications for the above-named objects and for the supervision of the execution thereof, for traveling expenses, field-office equipment and supplies, printing incident thereto, at a total limit of cost for such additional technical and clerical services and traveling expenses, etc., of not exceeding 3 per centum of the limit of cost for construction. All of the above-mentioned work shall be under the direction and supervision of the Secretary of the Treasury.

For the purpose of carrying the foregoing authorizations into effect, there is hereby appropriated, to be immediately available and remain available until expended, the sum of $30,000,000, and for furniture and equipment not otherwise provided for, the sum of $5,000,000, in all, $35,000,000 (*act Mar. 3, 1919, vol. 40, p. 1304; submitted*) 35,000,000.00

ical and Hospital Services—		
Medical and hospital services: For medical, surgical, and hospital services, medical examinations, funeral expenses, traveling expenses, and supplies, for beneficiaries of the Bureau of War Risk Insurance, including court costs and other expenses incident to proceedings heretofore or hereafter taken for commitment of mentally incompetent persons to hospitals for the care and treatment of the insane (*act June 5, 1920, vol. 41, pp. 881-884, sec. 1*).....	$50,000,000.00	[1] $46,000,000.00
This appropriation shall be disbursed by the Secretary of the Treasury and such portion thereof as he may deem necessary shall be allotted from time to time to the Bureau of War Risk Insurance, the Public Health Service, board of managers of the National Homes for Disabled Volunteer Soldiers, and the War and Navy Departments, and transferred to their credit for disbursement by them for the purposes set forth in this paragraph. The allotments to the said board of managers shall also include such sums as the Secretary of the Treasury may deem necessary to alter or improve existing facilities in the several branches under its jurisdiction so as to provide adequate accommodations for such beneficiaries of the Bureau of War Risk Insurance as may be committed to its care.		
The allotments made to the War and Navy Departments shall be available for expenditure under the various headings of appropriations made to said department as may be necessary, including necessary personnel and maintenance.		
The allotments made by the Secretary of the Treasury to the board of managers of the National Homes for Disabled Volunteer Soldiers for the care of beneficiaries of the War Risk Insurance Bureau by the said board shall also be available for expenditure by the board on that account at such of the homes and for such of the objects of expenditure at such homes, including the sums allotted for alteration and improvement of existing facilities so as to provide adequate accommodations for the beneficiaries of the Bureau of War Risk Insurance.		
The allotments made by the Secretary of the Treasury to the Public Health Service for the care of beneficiaries of the Bureau of War Risk Insurance by the said service shall also be available for expenditure by the Public Health Service on that account for medical, surgical, and hospital services and supplies, and medical examinations for patients of the War Risk Insurance Bureau, and trainees of the Federal Board for Vocational Education, including necessary personnel, regular and reserve commissioned officers of the Public Health Service, professional and clerical help in the District of Columbia and elsewhere; repairs, alterations, and improvements of hospitals; maintenance, equipment, leases, fuel, lights, water; printing, freight, transportation, and travel; purchase, exchange, maintenance, repair, and operation of motor trucks and passenger motor vehicles; court costs and other expenses incident to proceedings heretofore or hereafter taken for commitment of mentally incompetent persons to hospitals for the care and treatment of the insane; and reasonable burial expenses of patients.		
NOTE.—Expenditure detail of this estimate can not be given for any prior fiscal year, as the first appropriation for this sole purpose was made in the sundry civil act of June 5, 1920, and the operations under this appropriation have therefore extended over a period of only three months. The details of this estimate are based on the conditions existing during the quarter ending Sept. 30, 1920, as far as practicable.

[1] No appointment made to fill the vacancy of the position of Assistant Commissioner during the fiscal year 1920. His statutory salary of $5,000 per annum is covered into the United States Treasury.

[2] Secretary and disbursing officer acted as assistant to the commissioner in addition to his other duties and received extra compensation at the rate of $1,000 per annum in addition to his regular salary of $3,000 per annum.

[3] It is estimated that $35,000 will be necessary for the work of the Board of Mediation and Conciliation during the fiscal year 1922. The item of rental of offices in the District of Columbia can not be determined at this time. It is impossible to estimate particularly by items the amounts that will be necessary for compensation and subsistence of arbitrators and employees of boards of arbitration, reporting arbitrations, transportation, communication service, etc., all these depend upon the number of controversies arising to be mediated or arbitrated, which number can not be forctold.

NOTE.—This field force is not yet fully organized, because the board has not been able to secure a sufficient number of civil service eligibles during the fiscal year 1920. The column headed "Expended, 1920" shows therefore only the actual pay roll on June 30, 1920, and the total expenditures for salaries during the fiscal year. Since June 30, 1920, the board has been able to increase its field force considerably. The above estimates for 1922 are approximately the number necessary if the program of the board is extended to each State in the Union.

[1] The unexpended balance of approximately $250,000 of the appropriation for the fiscal year 1920 was reappropriated for 1921.

ROCK CREEK AND POTOMAC PARKWAY COMMISSION.		
Connecting Parkway Between Rock Creek and Potomac Parks—		
To enable the commission created by sec. 22 of the public buildings act approved Mar. 4, 1913 (37 Stat. L., p. 885), to continue proceedings toward the acquisition of lands required for a connecting parkway between Potomac Park, the Zoological Park, and Rock Creek Park, $300,000, to be available until expended, and to be chargeable against the Treasury of the United States and the revenues of the District of Columbia in proportion as authorized by law: *Provided*, That the total area of lands finally to be acquired for said parkway shall not exceed the area and parcels described and delineated on map No. 2, contained in House Document No. 1114 of the Sixty-fourth Congress, first session, and the additional lands in squares 2543 and 2544, described in the sundry civil act approved June 5, 1920: *Provided further*, That the expenditure of the funds appropriated herein shall be subject to all the conditions imposed by the sundry civil appropriation act approved July 1, 1916 (*acts Mar. 4, 1913, vol. 37, p. 885, sec. 22; Mar. 3, 1915, vol. 38, p. 829, sec. 1; July 1, 1916, vol. 39, p. 282, sec. 1; June 12, 1917, vol. 39, p. 669, sec. 1; July 1, 1918, vol 40, p. 650, sec. 1; July 19, 1919, vol. 41, p. 180, sec. 1; June 5, 1920, vol. 41, p. 890, sec. 1*).....	$300,000.00	$200,0

NOTE.—Section 22 of the public buildings act approved Mar. 4, 1913, created a commission to be composed of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, with authority to acquire, by purchase, condemnation, or otherwise, land for a connecting parkway between Potomac Park, the Zoological Park, and Rock Creek Park, and authorized the expenditure of $1,300,000 for the purpose. The sum of $50,000 was provided by sundry civil act approved July 1, 1916, to enable the commission to commence proceedings; $100,000 by sundry civil act approved June 12, 1917; $150,000 by sundry civil act approved July 1, 1918; $250,000 by sundry civil act approved July 19, 1919; and $200,000 by sundry civil act approved June 5, 1920. From the purchases made up to Sept. 1, 1920, over $137,900, including all expenses, has been saved as compared with the assessor's valuation of the land purchased. Negotiations now under way, if brought to a successful termination, will consume the greater part of the present appropriation of $200,000. It is believed that a continuation of the favorable results so far obtained can best be effected by an unbroken chain of appropriations, especially as the United States is now in possession of over 68 per cent of the area within the taking lines. It is therefore recommended that the sum of $300,000 herein requested be appropriated at the next session of Congress.

D. F. HOUSTON,
Secretary of the Treasury,
Chairman Rock Creek and Potomac Parkway Commission.

STATEMENT OF UNIT COSTS.

Field work:	
Sounding, per square mile	$49.57
Sweeping, per square mile	125.40
Topography, per square mile	64.80

NOTE.—Above values are average costs for the work of three hydrographic parties during the three calendar years, 1917-1919. They include all supervision and overhead expenses, depreciation, and ordinary repair of plant and equipment, and care of floating plant during the closed season, but do not include the establishment of control in the field nor office reductions. The rates of progress on hydrography, and hence the unit costs, vary greatly, due in part to weather conditions, but more particularly to the character of the areas to be surveyed. The greater portion of the sweeping on the Great Lakes is in exposed locations and in shoal waters, where operations are difficult and expensive.

The topography executed by the Lake Survey is for the most part incident to the hydrographic operations and is obtained when weather conditions prevent work on the open lake. There is but little additional expense involved, although the cost shown above is derived by applying a proportionate part of the field expenses to the time employed on topographic surveys.

Operation of 3 large steamer parties on hydrographic surveys and topographic surveys—	
Each, per day	121.00
Each, per season	23,500.00

NOTE.—These daily and seasonal costs of operating steamer parties include supervision and overhead expenses, depreciation, and ordinary repair of plant and equipment, and maintenance and care of floating plant during the closed season.

Operation of party on harbor surveys (including supervision and winter office work)	12,500.00
Operation of party on triangulation (including supervision and winter office work), per year	12,500.00
Operation of party on survey of Lake of the Woods (including supervision and winter office work), per year	10,000.00
Charts:	
Engraving, construction, and publication of new coast chart	1,000.00–1,400.00
Engraving, construction, and publication of new harbor chart	500.00–2,300.00
Revision to standards of both water level and projection, and publication of new edition	500.00–2,100.00
Revision to standard projection and publication of new edition	300.00–875.00
Revision to standard low water and publication of new edition	500.00–1,800.00
Correction of engravings and preparation for new edition, maintenance of chart series, average cost per edition, for 20 editions issued in fiscal year 1920, about	540.00
Publication cost per edition, average of 24 editions issued in fiscal year 1920, about	332.00

DISTRICT OF COLUMBIA.

e it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That 40 per cent of the following sums, respectively, is appropriated out of any money in the Treasury not otherwise appropriated, and 60 per cent out of the revenues of the District of Columbia, in full for the following expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, only, namely:

ppropriations for the fiscal year ending June 30, 1922, heretofore or hereafter made in other acts and chargeable in any proportion against the revenues of the District of Columbia, shall be paid in the proportions of 40 per cent from the Treasury of the United States and 60 per cent from the revenues of the District of Columbia.

the estimated net revenues of the District of Columbia for the fiscal year ending June 30, 1922, are not sufficient to meet the proportion of the appropriations for that fiscal year charged against such revenues by this and all other acts, or which may be estimated to be charged against such revenues by acts that may be approved during such fiscal year, the Commissioners of the District of Columbia shall increase the rates of taxation on real estate and tangible personal property sufficiently to make up the difference: *Provided, however*, That such rates of taxation shall in no event be less than 1½ per cent nor more than 2 per cent.

That hereafter the Commissioners of the District of Columbia are authorized whenever in their judgment the public health, safety, comfort, or convenience requires the paving of the roadway of any street, avenue, or road in the District of Columbia, and the private property abutting such roadway is improved to the extent of 75 per cent of the total frontage of both sides of the roadway, to pave such roadway upon application of interested property owners accompanied by a deposit equal to one-half the estimated cost of the work, and to pay the total cost of such work from the appropriation herein made for said purpose, and there is hereby appropriated for said purpose the sum of $50,000. Said deposit shall be made to the collector of taxes of the District of Columbia, and all moneys received by him on this account shall be deposited by him in the United States Treasury to the credit of the "Permit fund," created by act of Congress, approved Aug. 7, 1894. Upon the completion of the work done as aforesaid at the request of property owners, the commissioners shall repay into the Treasury of the United States out of said "Permit fund" a sum equivalent to one-half of the cost of the work, and shall return to the depositors from the same fund any surplus that shall remain over and above one-half of the cost of the work (*submitted*).. 50,000.00

Condemnation of streets, roads, and alleys:

For purchase or condemnation of streets, roads, and alleys *(same acts)* 1,000.00

To carry out the provisions contained in the District of Columbia appropriation act for the fiscal year 1914 which authorizes the commissioners to open, extend, or widen any street, avenue, road, or highway to conform with the plan of the permanent system of highways in that portion of the District of Columbia outside of the cities of Washington and Georgetown, there is appropriated, payable entirely from the revenues of the District of Columbia, such sum as is necessary for said purpose during the fiscal year 1922 *(same acts)*.

Repairs—Streets, avenues, and alleys: For current work of repairs of streets, avenues, and alleys, including resurfacing and repairs to asphalt pavements with the same or other not inferior material, and including the maintenance of motor vehicles, and including an allowance of not to exceed $35 per month for an automobile for use for official purposes (increase of $125,000 submitted) *(same acts)* 700,000.00

This appropriation shall be available for repairing pavements of street railways when necessary; the amounts thus expended shall be collected from such railroad companies as provided by sec. 5 of "An act providing a permanent form of government for the District of Columbia," approved June 11, 1878, and shall be deposited to the credit of the appropriation for the fiscal year in which they are collected.

The authority given the commissioners in the District of Columbia appropriation act approved Mar. 2, 1907, to make such changes in the lines of the curb of Pennsylvania Avenue and its intersecting streets in connection with their resurfacing as they may consider necessary and advisable is made applicable to such other streets and avenues as may be improved under appropriations contained in this act: *Provided*, That no such change shall be made unless there shall result therefrom a decrease in the cost of the improvement.

NOTE.—The cost of maintenance as shown by above table for fiscal year 1920 will be exceeded in 1921 and 1922 owing to the increased cost of labor and material and the following replacements urgently needed at the pumping station to bring certain machinery up to date:

Two 125 kilowatt condensing generator sets, complete, to replace present 50 kilowatt and 150 kilowatt electrical units, at an estimated cost of $40,000. Our present units are of an obsolete type which can not be operated economically, and can not be safely operated much longer. These units were among the first to be installed at this plant.

The commissioners are further authorized to employ temporarily such laborers, skilled laborers, and mechanics as may be required in connection with water-department work, and to incur all necessary engineering and other expenses, exclusive of personal services, incidental to carrying on such work and necessary for the proper execution thereof, said laborers, skilled laborers, and mechanics to be employed to perform such work as may not be required by existing law to be done under contract, and to pay for such services and expenses from the appropriation under which such services are rendered and expenses incurred.		
SEC. 5. That the commissioners are authorized to employ in the execution of work the cost of which is payable from the appropriation account created in the District of Columbia Appropriation Act, approved Apr. 27, 1904, and known as the "Miscellaneous trust-fund deposits, District of Columbia," all necessary inspectors, overseers, foremen, sewer tappers, skilled laborers, mechanics, laborers, special policemen stationed at street-railway crossings, one inspector of gas fitting, two janitors for laboratories of the Washington and Georgetown Gas Light Cos., market master, assistant market master, watchman, bookkeeper in the auditor's office, clerk in the office of the collector of taxes, horses, carts, and wagons, and to hire therefor motor trucks when specifically and in writing authorized by the commissioners, and to incur all necessary expenses incidental to carrying on such work and necessary for the proper execution thereof, and including the maintenance of motor vehicles, such services and expenses to be paid from said appropriation account.		
SEC. 6. That the commissioners and other responsible officials, in expending appropriations contained in this act, so far as possible shall purchase material, supplies, including food supplies and equipment, when needed and funds are available, from the various services of the Government of the United States possessing material, supplies, and equipment no longer required because of the cessation of war activities. It shall be the duty of the commissioners and other officials, before purchasing any of the articles described herein, to ascertain from the Government of the United States whether it has articles of the character described that are serviceable. And articles purchased from the Government, if the same have not been used, shall be paid for at a reasonable price, not to exceed actual cost, and if the same have been used, at a reasonable price based upon length of usage. The various services of the Government of the United States are authorized to sell such articles to the municipal government under the conditions specified and the proceeds of such sales shall be covered into the Treasury as a miscellaneous receipt: *Provided*, That this section shall not be construed to amend, alter, or repeal the Executive order of December 3, 1918, concerning the transfer of office material, supplies, and equipment in the District of Columbia falling into disuse because of the cessation of war activities.		
SEC. 7. That on and after July 1, 1921, all fees, fines, and other miscellaneous items of revenue theretofore required by law to be paid into the Treasury of the United States to the credit of the United States and the District of Columbia in equal parts, shall be paid into the Treasury of the United States to the credit of the United States and the District of Columbia in the same proportions as appropriations for the expenses of the government of the District of Columbia are paid from the Treasury of the United States and the revenues of the District of Columbia; and all collections on account of special assessments for public improvements for which assessments are levied according to the law, shall be paid into the Treasury of the United States to the credit of the United States and the District of Columbia in the same proportion as that used in paying for the work for which the assessment was levied (*submitted*).		
SEC. 8. Officers and members of the Metropolitan police and fire departments of the District of Columbia and the United States Park Police shall be allowed increased compensation for the fiscal year 1922 in accordance with the provisions of the legislative, executive, and judicial appropriation act for the fiscal year 1922, at the rate allowed the other employees of the District of Columbia in said act.

EC. 4. That so much, not to exceed three per centum, of the appropriation for any fiscal year made by or under this act as the Secretary of Agriculture may estimate to be necessary for administering the provisions of this act shall be deducted for that purpose, available until expended. Within 60 days after the close of each fiscal year the Secretary of Agriculture shall determine what part, if any, of the sums theretofore deducted for administering the provisions of this act will not be needed for that purpose and apportion such part, if any, for the fiscal year then current in the same manner and on the same basis, and certify it to the Secretary of the Treasury and to the State highway departments, and to the governors of States having no State highway departments, in the same way as other amounts authorized by this act, to be apportioned among all the States for such current fiscal year. The Secretary of Agriculture, after making the deduction authorized by this section, shall apportion the remainder of the appropriation for each fiscal year among the several States in the following manner: One-third in the ratio which the area of each State bears to the total area of all the States; one-third in the ratio which the population of each State bears to the total population of all the States, as shown by the latest available Federal census; one-third in the ratio which the mileage of rural delivery routes and star routes in each State bears to the total mileage of rural delivery routes and star routes in all the States, at the close of the next preceding fiscal year, as shown by the certificate of the Postmaster General, which he is directed to make and furnish annually to the Secretary of Agriculture.			
EC. 5. That within 60 days after the approval of this act the Secretary of Agriculture shall certify to the Secretary of the Treasury and to each State highway department and to the governor of each State having no State highway department the sum which he has estimated to be deducted for administering the provisions of this act and the sum which he has apportioned to each State for the fiscal year ending June 30, 1917, and on or before January 20 next preceding the commencement of each succeeding fiscal year shall make like certificates for such fiscal year (*act July 11, 1916, vol. 39, p. 356, secs. 1, 3, 4, 5*).....	.....	$25,000,000.00	$20,305,622.75
rative Construction, etc., of Roads and Trails, National Forests—			
EC. 8. That there is hereby appropriated and made available until expended, out of any moneys in the National Treasury not otherwise appropriated, the sum of $1,000,000 for the fiscal year ending June 30, 1917, and each fiscal year thereafter, up to and including the fiscal year ending June 30, 1926, in all $10,000,000, to be available until expended under the supervision of the Secretary of Agriculture, upon request from the proper officers of the State, Territory, or county for the survey, construction, and maintenance of roads and trails within or only partly within the national forests, when necessary for the use and development of resources upon which communities within and adjacent to the national forests are dependent: *Provided*, That the State, Territory, or county shall enter into a cooperative agreement with the Secretary of Agriculture for the survey, construction, and maintenance of such roads or trails upon a basis equitable to both the State, Territory, or county, and the United States: *And provided also*. That the aggregate expenditures in any State, Territory, or county shall not exceed 10 per cent of the value, as determined by the Secretary of Agriculture, of the timber and forage resources which are or will be available for income upon the national forest lands within the respective county or counties wherein the roads or trails will be constructed; and the Secretary of Agriculture shall make annual report to Congress of the amounts expended hereunder. That immediately upon the execution of any cooperative agreement hereunder the Secretary of Agriculture shall notify the Secretary of the Treasury of the amount to be expended by the United States within or adjacent to any national forest thereunder, and beginning with the next fiscal year and each fiscal year thereafter the Secretary of the Treasury shall apply from any and all revenues from such forest 10 per cent thereof to reimburse the United States for expenditures made under such agreement until the whole amount advanced under such agreement shall have been returned from the receipts from such national forest.			
EC. 9. That out of the appropriations made by or under this act, the Secretary of Agriculture is authorized to employ such assistants, clerks, and other persons in the city of Washington and elsewhere, to be taken from the eligible lists of the Civil Service Commission, to rent buildings outside of the city of Washington, to purchase such supplies, material, equipment, office fixtures, and apparatus, and to incur such travel and other expense as he may deem necessary for carrying out the purposes of this act (*act July 11, 1916, vol. 39, p. 358, secs. 8, 9*).....	$1,000,000.00	1,000,000.00	1,699,043.82

Payment to States and Territories from the National Forests Fund—			
That hereafter 25 per cent of all money received from each forest reserve during any fiscal year, including the year ending June 30, 1908, shall be paid at the end thereof by the Secretary of the Treasury to the State or Territory in which said reserve is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated: *Provided*, That when any forest reserve is in more than one State or Territory or county the distributive share to each from the proceeds of said reserve shall be proportional to its area therein (*acts Mar. 4, 1907, vol. 34, p. 1270, sec. 1; May 23, 1908, vol. 35, p. 260, sec. 1*).....			
That 5 per cent of all moneys received during any fiscal year from each national forest into which the lands acquired under this act may from time to time be divided shall be paid, at the end of such year, by the Secretary of the Treasury to the State in which such national forest is situated, to be expended as the State legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which such national forest is situated: *Provided*, That when any national forest is in more than one State or county the distributive share to each from the proceeds of such forest shall be proportional to its area therein: *Provided further*, That there shall not be paid to any State for any county an amount equal to more than 40 per cent of the total income of such county from all other sources (*act Mar. 1, 1911, vol. 36, p. 963, sec. 13*).....	$1,200,000.00	$1,200,000.00	$1,069,8[illegible]
That sec. 13 of the act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved Mar. 1, 1911 (36 Stat. L., 963), is hereby amended by striking out the word "five" in the first line of said section and inserting in lieu thereof the word "twenty-five" (*act June 30, 1914, vol. 38, p. 441, sec. 1*).....			
Cooperative Work, Forest Service—			
Hereafter all moneys received as contributions toward cooperative work in forest investigations shall be covered into the Treasury and shall constitute a special fund, which is hereby appropriated and made available until expended, as the Secretary of Agriculture may direct, for the payment of the expenses of said investigations by the Forest Service and for refunds to the contributors of amounts heretofore or hereafter paid in by them in excess of their share of the cost of said investigations (*acts Mar. 3, 1905, vol. 33, p. 1070, sec. 1; June 30, 1906, vol. 34, p. 684, sec. 1*).....			
That hereafter all moneys received as contributions toward cooperative work in forest investigations, or the protection and improvement of the national forests, shall be covered into the Treasury and shall constitute a special fund, which is hereby appropriated and made available until expended, as the Secretary of Agriculture may direct, for the payment of the expenses of said investigations, protection, or improvements by the Forest Service, and for refunds to the contributors of amounts heretofore or hereafter paid in by them in excess of their share of the cost of said investigations, protection, or improvements: *Provided*, That annual report shall be made to Congress of all such moneys so received as contributions for such cooperative work (*act June 30, 1914, vol. 38, p. 430, sec. 1*).....	1,800,000.00	600,000.00	1,635,90[illegible]
That hereafter deposits may be received from timber purchasers in such sums as the Secretary of Agriculture may require to cover the cost to the United States of disposing of brush and other débris resulting from cutting operations in sales of national forest timber; such deposits shall be covered into the Treasury and shall constitute a special fund, which is hereby appropriated and made available until expended, as the Secretary of Agriculture may direct, to pay the cost of such work and to make refunds to the depositors of amounts deposited by them in excess of such cost (*act Aug. 11, 1916, vol. 39, p. 462, sec. 1*).....			
Payments to School Funds, Arizona and New Mexico, National Forests Fund—			
At the close of each fiscal year there shall be paid by the Secretary of the Treasury to the State, as income for its common-school fund, such proportion of the gross proceeds of all the national forests within said State as the area of lands hereby granted to said State for school purposes which are situated within said forest reserves, whether surveyed or unsurveyed, and for which no indemnity has been selected, may bear to the total area of all the national forests within said States (*act June 20, 1910, vol. 36, p. 557, sec. 1*).....	70,000.00	85,000.00	78,80[illegible]
Roads and Trails for States, National Forests Fund—			
That hereafter an additional 10 per cent of all moneys received from the national forests during each fiscal year shall be available at the end thereof, to be expended by the Secretary of Agriculture for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived; but the Secretary of Agriculture may, whenever practicable, in the construction and maintenance of such roads, secure the cooperation or aid of the proper State or Territorial authorities in the furtherance of any system of highways of which such roads may be made a part (*act Mar. 4, 1913, vol. 37, p. 843, sec. 1*).....	500,000.00	500,000.00	465,82[illegible]
Proceeds, Sale of Timber from Indian Lands, Uintah National Forest—			
Indefinite appropriation of the proceeds from the sale of timber on Uintah National Forest; such sums as may be appropriated being available for transfer from this special fund to the Indian trust fund "Proceeds of Uintah and White River Ute lands," upon request of the Secretary of the Interior (*act Mar. 3, 1905, vol. 33, p. 1070, sec. 1*).

APPENDIX B.

morandum explaining increases, changes, etc., in the estimates of the Department of State for the fiscal year ending June 30, 1922. (Estimates on pp. 33 to 34 and 345 to 353.)

DEPARTMENT OF STATE, *Washington, November 23, 1920.*

e SECRETARY OF THE TREASURY.

SIR: In preparing the estimates for appropriations for the Department of State for the fiscal year ending June 1922, I have been constrained to dwell principally on the administration of foreign affairs, a vitally important ıction of the Chief Executive executed through the medium of the Department of State. However, in conformity h your desire that items of general legislation be eliminated from the estimates, I have refrained from advancing ailed proposals for the reorganization, particularly, of the Diplomatic and Consular Services as the statutory ınges urgently required are of such a nature as to demand separate treatment.

I need not emphasize that the present economic and political condition of the world, reacting as it does to-day our internal economic and political stability, has placed on the department a vital responsibility undreamed of the past. The Nation's future demands an increase of efficiency in the handling of our foreign relations equal to added responsibility.

One of the purposes I have in view in proposing a substantial reorganization of the Department of State is to rease its efficiency by strengthening the effective staff of expert officials, at home as well as abroad, so that, both observers and as politico-economists they may conjointly carry out the best purposes of the Government.

The United States is no longer a self-sufficing agricultural nation. Foreign markets for our industrial products st be found or created. In addition, by an economic policy carefully planned and guided, the consumer's ability pay must be developed.

Acute international competition exists for vital raw materials. Any advantage gained in their complete control one of the great powers means success against the competition of others, and is a step in the direction of commercial ›remacy.

Nations are incited to extend their efforts to the remote and undeveloped regions of the earth, in order to ablish control over the initial sources of supply to their own advantage. It is probably in this field that the ervention of Governments is to-day playing its most active part. The universality of the struggle for petroleum, coal and fuel problem, the supply of wood pulp, and of many other essential prime necessities are examples of s tendency.

The increased proportion of people residing in cities indicates an intensive industrial movement, the inevitc tendency of which is to render us more and more dependent upon foreign sources of supply of raw materials, l more and more sensitive to foreign conditions. Thus on the basis of our present industrial status it may be l that we have a dual dependency upon the foreign world; that of markets for the surplus of our industrial pro‹tion, and that of readily accessible raw materials to meet the growing national deficit.

During the year ended June 30, 1920, the United States imported raw materials for manufacturing purposes the extent of $2,141,644,621, including necessities essential to a state of general preparedness. A constant vigice must be exercised to prevent the loss of the advantages to which we are justly entitled and to keep abreast the competitive activities of others. This burden very naturally falls upon the foreign service, the effectiveness whose work depends in turn upon the strength and general efficiency of the Department of State.

During the war the foreign demand for manufactured products gave stimulus to industrial development. As a ılt of unlimited open markets at our command, this country is, and has been for several years, keyed up to a h pitch of industrial production. It could not revert to prewar conditions; its proportions have changed.

But other nations are now reviving and intensifying their competition. They have a fourfold object in view:

1. To gain their former markets;
2. To occupy the markots formerly controlled by the enemy powers;
3. To attain a higher dogree of economic production, thus rectifying deficiencies felt during the war;
4. To liquidate their national indebtednesses.

It is easy to realize that in this state of affairs diplomacy can no longer be mainly concerned with political stions, but must devote greater attention to far-reaching economic issues.

It is to this end that a substantial strengthening of the economic machinery of the Department of State is neces-y. There is no intention or desire to encroach upon, to overlap, or to duplicate the important work now per-ned by the Department of Commerce. On the contrary, the aim is to give effective purpose and direction to lomacy, while at the same time affording even greater facilities for supplying more precise and better digested terial to the Department of Commerce, which is in direct and continuous contact with the business world, and ch is charged with the dissemination of commercial information. The present facilities at the disposal of the)artment of State are insufficient, and as a consequence the arm of diplomacy is becoming less effective at the ‹y moment when conditions are demanding that it should become more effective.

In financial affairs the United States has suddenly shifted from the position of a debtor nation to that of the ıtest of creditor nations. Henceforth, instead of engaging in large-scale borrowings from abroad for the purposes llomestic development, we shall lend steadily and on an increasing scale to foreign countries for their rehabilitation improvement. There is a very pressing need for the further extension of American banking facilities abroad. e export of capital bears an intimate relation to the export of goods.

To cope with the situation the Department of State and our foreign service must be provided with an effe organization possessing an adequate staff of technical experts. This is necessary, not only to ascertain all perti facts, but that analysis and close examination may precede action, and that action may be directed with uner precision.

I have dwelt largely upon the economic aspects of our international problems for the purpose of illustra more clearly their immediate and direct bearing upon all that is vital in our national life. Other governments keenly alive to present exigencies. They have gone forward with their programs, equipped for energetic actio the furtherance of skillfully conceived and far-reaching policies, which we must do more than merely see and c prehend. For these reasons the proposals which I am advancing for the strengthening of the Department of S and of the foreign service become a serious national duty arising from conditions of most pressing necessity.

ASSISTANT SECRETARIES OF STATE.

To fortify and strengthen the Department of State, the first essential is to give greater force and stability to positions of those responsible officials who form the directorship as it were, and upon whose ability and close coll ration the Secretary of State must largely depend for the manner in which the important executive functions of department are discharged. There are five such officials; the Under Secretary of State, whose present salar $7,500; the Assistant Secretary of State, $5,000; the Second and Third Assistant Secretaries of State and the Dire of the Consular Service, who receive $4,500 each, salaries which require positive and unwarranted personal sacr on the part of each. This fundamental error should be rectified, and it is to this end that I have recommended mates increasing the salary of the Under Secretary of State to $10,000, and the salaries of the Assistant Secretari State and the Director of the Consular Service to $7,500, such increase being justified by the known capacity of incumbents, each in his particular sphere of expert attainment.

DRAFTING OFFICERS.

The appropriations for the current fiscal year provide for 60 officers to aid in important drafting work, wl salaries range from $2,500 to $4,500, and for 5 chiefs of bureaus at $2,100 and 2 at $2,500 each. There is also at disposal of the department an appropriation of $402,500, for temporary employees, with a limitation of $5,000 to rate of compensation which may be paid any person employed thereunder, and a further limitation that not m than eight persons shall be employed at a rate of compensation exceeding $1,800, except 4 at $4,500 each; 3 at $4,0 each; 10 at $3,500 each; and 5 at $2,500 each. In the present organization there are 15 persons paid from this t porary fund who are performing the duty of drafting officers.

The position of chief of bureau has become one which it is impracticable to fill with a competent person at e statutory rate of compensation for that office. I am requesting, therefore, that these three classes of officers e combined in the general designation of officers to aid in important drafting work, and grouped according to a sche of compensation more nearly commensurate with their expert capacity and with the importance of their dut I am further asking that the number of such officers be increased substantially to meet the requirements of e enlarged scheme of operations now offered for consideration. This increase is the very heart of the reorganizat plan, because upon it depend the facilities which the Department of State will find at its command in measu up to the requirements of its great task. Although all these positions have their definite and responsible place the general scheme, it is desired that they be not so restricted at the present time by legislation as to destroy t essential degree of elasticity which the department must possess in translating its theoretical scheme into a pract working mechanism. Upon these officers will devolve the performance of all analytical work as well as the execut direction of the several geographical divisions with their dependent sections. I can not urge too strongly the nec sity of strengthening the department to the degree and in the manner that I have recommended in this regard.

ASSISTANT SOLICITORS.

At present there are seven statutory positions of assistant solicitor, as follows: Five at $3,000 each and two t $2,500. This number, being wholly inadequate, is supplemented by nine drafting officers and one officer paid fr the temporary roll, all of ascertained capacity. The present proposals are, therefore, for the purpose of plac these officers under their proper designation as assistant solicitors and increasing the scale of salaries to a sufficie degree to permit their retention or the employment of other men of the required degree of competency.

CLERK HIRE, DEPARTMENT OF STATE.

The item now proposed for clerks abolishes the lump-sum appropriation of $402,500 for additional employe transfers the employees now paid from that fund to the statutory roll, and makes a slight increase in the numb of employees and a readjustment as to class.

The present clerical staff of the department comprises the following:

Statutory employees	210	$277,200
Additional employees	289	331,280
	499	608,480

The estimates for the fiscal year 1922 under the new arrangement would increase their number by 33 and t amount of the appropriation by $135,820.

NONCLERICAL POSITIONS.

At the present time there are 60 employees of the nonclerical class (messengers, assistant messengers, laborers, rwomen, etc.) who are paid from the temporary roll. The increases shown in the present estimates in the statu- places of this character result from the mere transfer of these positions from the temporary to the statutory roll.

CONTINGENT EXPENSES.

As it is impossible to operate this department under existing conditions on any sum approaching that of the war period, a large increase has been estimated in the amount needed for the ordinary operating expenses.

SAFEGUARDING OF THE DECLARATION OF INDEPENDENCE, THE CONSTITUTION, AND IMPORTANT ARCHIVES.

Quite apart from the improvement of the facilities of the Department of State for fulfilling its purpose, there is ther matter of the highest importance which should urgently demand the immediate attention of Congress. The le which the people of this country feel in the two great documents so vitally connected with the very foundation he Government will be rudely shaken when they realize that the originals of the Declaration of Independence and Constitution are deposited in an ordinary safe of thin steel, proof against neither fire nor water, which stands in library of this department, necessarily surrounded on all sides with the combustible material usually found in aries. The National Board of Fire Underwriters has reported officially (S. Doc. No. 344, 65th Cong., 2d sess.) t this safe would probably not stand a severe fire over 20 minutes, and in case of fire in the room in which these uments are stored, there is little doubt that they would be severely damaged from the water which would certainly etrate the interior of the safe.

The Secretary of State appointed a commission composed of Mr. Gaillard Hunt, for many years Chief of the ision of Manuscripts of the Library of Congress; Mr. Worthington C. Ford, editor of the Massachusetts Historical iety, and previously of the Library of Congress; and Mr. Robert W. W. Connor, secretary of the North Carolina torical Commission, to examine the documents and suggest means for their better preservation. These gentlemen ıted out the grave danger in which these papers would be placed were a fire to occur in this building. In their ıion no time should be lost in providing adequate means of protecting them against fire, water, and violence. It ıe view of the commission that these documents may safely be exhibited without suffering injury, and it is there- believed to be highly desirable to provide for their exhibition during the business hours in the hope of encourag- and stimulating a wholesome respect for them and for the Government founded upon them.

These, however, are not the only historical documents of great value in the custody of the Secretary of State ch are in like grave danger from fire or other mishap. In a room near the Library are deposited the official Jour- of the Constitutional Convention, certain selected treaties and proclamations, the records of all boundary disputes settlements with claims and original maps, the original proclamations and orders of all the Presidents, all in ›den boxes, old, dry, and highly inflammable, in a crowded room where there are poor facilities for their appropriate convenient use. In case of fire the wooden cases would inevitably burn with all their contents.

In a room in the subbasement, remote, unsuitable, crossed by large heat supply pipes, are kept the original laws Congress, the treaties to which the United States is a party, and other similar documents. They are unsatisfac- ly arranged, and the seals belonging to a number of the treaties have been broken, injured, or lost through hand- or moving them from one place to another. The necessity for the adoption of adequate means for the proper servation of all these historical papers requires no argument.

The remedy appears to me to be exceedingly simple. With not more than $20,000 it is believed that a large m in this building could be made sufficiently secure and equipped with safes of the most approved fireproof con- ıction in which all the valuable documents could be adequately protected. The safes could be so arranged as ›ermit the daily exhibition of these historical papers.

Immediate action in this sense is imperative as well as adequate protection for other valuable archives of the artment. Their loss or damage would gravely handicap the conduct of our foreign relations and prove disastrous he interests of the Government as well as to those of many private individuals. Deposited elsewhere are the lence and other documents connected with claims against foreign Governments, still uncollected, amounting to ost $1,000,000,000.

In concluding its report upon the condition of these archives, the commission to which I have referred says:

Finally we can not refrain from calling attention to the wooden cases in which most of the records of the department are stored. They consti- a real danger to their contents. Steel cases would insure greater safety, convenience, economy of time and space, and offer better protection ıst dust. We are aware that the department's present quarters make the apportionment of space for the accommodation of records a difficult lem, but standardized cases of steel should be substituted for the existing cases of wood.

By increasing the allotment of space in this building assigned to the Department of State and appropriating not e than $25,000 for the purchase of steel filing cases in which to store the archives, Congress can quickly remedy condition which I have described. The seriousness of it can be appreciated from the following extract from the ›rt of the National Board of Fire Underwriters upon conditions in the Department of State:

The supreme importance of preserving this building from fire can not be overestimated. Every reasonable precaution should be taken. idering the nature of the contents housed within its walls, it is, without question, the most valuable structure in the United States to-day. destruction of no single building, or group of buildings, which could be named in this country, with the possible exception of a few public ries, would entail a loss comparable for a moment with that which the burning of this building would inflict. The value of the contents ıot be measured in money; they are priceless.

CLERKS AT EMBASSIES AND LEGATIONS.

The current appropriation for clerks at embassies and legations is inadequate for the present requirements of the service. There is a shortage in the clerical staff at various missions, and all available funds have already been allo except a small margin which does not suffice to fulfill the present requirements, and would not meet any sudden em gency or general increase in the volume of business. As an instance, I may cite the case of the Minister to Ser who, for lack of proper clerical assistance, is forced to type in person his dispatches and reports to the departm It should be recalled that only American citizens are employed under this appropriation, and great difficulty is b encountered in finding employees possessing the necessary expert capacity who are willing to accept these posit at the old salary rates; in fact, the sending out of American employees appointed under civil-service rules and reg tions may be regarded as necessitating the payment of $2,000 per annum as a minimum. With the opening of new missions contemplated in the estimates for 1922, there will be an additional demand for competent employ and it would be a false economy for the department not to be in a position to supply the essential clerical help to for the present huge volume of routine work. It will be seen from the foregoing that the estimate of the departm is based primarily upon the number of clerks actually and urgently required, whereas there is the additional consid tion of merited promotions for which at least a fair allowance should be made in justice to many of the efficient ployees now on duty.

As the investigations required of the diplomatic agents may involve many questions of technical importanc I think it necessary that the more prominent missions should have expert research attachés assigned to them, so that assistance of trained specialists may be available to the chief of mission. In this line, as in many others, the w of trained specialists has replaced that of general practitioners.

QUARTERS FOR STUDENT INTERPRETERS IN JAPAN.

In harmony with the practice of other governments, the United States provides quarters for its student in preters at Tokyo. This is deemed necessary owing to the small salaries paid to students ($1,500 per annum), and o the desirability that they be housed together. Although the embassy building at Tokyo is owned by the Governm it does not contain sufficient space to lodge them. Therefore, a separate annual appropriation of $600 has b necessary to cover the rent of quarters for this purpose.

On December 1, 1918, this rent was raised to $800. Until recently, the difference in the rental and the app priation ($600) was met by permitting clerks of the embassy to reside in the quarters, and applying the amo paid by them for lodging to the rental.

Beginning July 1, 1920, the rent was increased to $1,200. There are no other suitable quarters available a lower rate, and no member of the embassy staff other than student interpreters is at present willing to lodge in e rented buildings. The appropriation under this item needs therefore to be increased to $1,200.

CONTINGENT EXPENSES.

With the estimates of last year covering appropriations for the fiscal year ending June 30, 1921, the departm requested $1,310,000 for "Contingent expenses, foreign missions," of which only $900,000 was allowed. It likev requested $1,168,000 for "Contingent expenses, United States consulates," of which $1,000,000 was allowed, t s making a total reduction in the contingent expense appropriation for the two branches of the service of $578,0 There are certain fixed charges under this appropriation, such as rent, light, heat, upkeep, furniture, messen service, etc., all of which are essential and could not be reduced. Of the $900,000 appropriated for foreign missi nearly one-third ($255,966.55), which is now allotted for rent, heat, light, messenger, and janitor services, is ina quate. In addition to these items, there must be paid from this appropriation the cost of repairs required un contracts of lease, as well as repairs to buildings owned or leased by the Government of the United States and occup by diplomatic missions, besides postage, telegrams, furniture, and all other items of equipment, as well as losses exchange and the expense of maintaining Government dispatch agents at London, New York, San Francisco, a New Orleans.

Allotments have been adjusted to the reduction required by Congress by a substantial curtailment in expenditu for the current fiscal year.

The following characteristic results of this policy may be noted:

The American mission in Berlin, housed in a building which the Government holds on a long lease, is in su bad condition that water soaks through cracks in the walls to the extent that the wall paper is peeling off; the r is so defective that in a hard rainstorm pails have to be placed about one of the rooms to catch the water. T department has been obliged to refuse very urgent requests for funds from its representative in Constantino where the embassy building belonging to the United States is reported to be seriously deteriorating because of lo delayed repairs. The American minister at Peking recently asked that he be allowed a small sum for repairs to t Government-owned buildings at that capital, but the department was compelled to refuse the request, though t repairs were clearly shown necessary for the preservation of the property. To a lesser extent similar conditions ex at Tokyo. The resulting conditions are not only mortifying but are improvident from the point of view of busin economy.

Owing to the increasing difficulties of travel and the uncertainty of mail delivery, it has been necessary to ma tain in Europe a special courier service to safeguard confidential correspondence between the Department of St and the several embassies and legations. The estimated cost of the courier service for the current fiscal year $249,940.

A more adequate appreciation of the urgency of the above needs may be obtained from the following brief scription of conditions in the foreign service.

The item for rents in both services has been growing continuously, due to the rapid increase in rentals in all ·ts of the world, in some instances as much as 400 per cent increase.

The rates of general increase for rents averages $5,000 a month. This can not be met by measures of economy. alternative would be to move our diplomatic and consular quarters to less accessible and less desirable sections he cities.

An officer of the Department of State recently sent to Europe to investigate conditions reports, for example, t in Sofia, Bulgaria, the chargé d'affaires has a good house, in which two rooms are used for a chancery. His se expires soon, when he will literally be turned into the street, because he can find no suitable quarters in any t of the city which the department can afford to pay for. In Budapest the American mission is situated in rooms ch are disgraceful. The approach is through a courtyard and up two steep flights of stairs, smelling outrageously l always crowded with people making application for visés or coming on legitimate American business. There o little space that these crowds have to be herded by Hungarian policemen. The offices are gloomy and inadequate. code room is a dark hole, where the odors from a drain are unendurable. Yet decent quarters can not be obtained ause there is no money to pay the enormously increased rents demanded.

Practically one-third of the present appropriation and one-fourth of the estimate for the next fiscal year will be rent.

Exchange, another item which can not be controlled, is mounting steadily. It will not be possible to eliminate from this source until exchange rates in the various countries reach a normal basis. This item now takes one-enth of the present appropriation.

LOSS BY EXCHANGE.

1908	$8,828.95
1914	8,525.96
1917	46,125.08
1918	122,749.46
1919	135,200.32

Because of increased rates and the expanding foreign interests of the United States, both commercial and political, cost of telegrams has necessarily increased to important proportions. The following figures are enlightening:

1914	$69,322.84
1919	345,457.33

The above rate of expenditure has been reduced considerably for the current year, and it is hoped may be further uced next year, but even with the greatest economy, a reduction below $150,000 can not but prejudice goveru-ntal business and indirectly important commercial interests.

For the past six years, due to war conditions which rendered the purchase of furniture difficult, freight rate ost prohibitive, and safe delivery abroad well-nigh impossible, the department has been unable to meet the needs he service as regards the supply of necessary furniture. For the past two or three years, as well as for the current r, the department has been compelled to refuse all requests for furniture, no matter how necessary, for the equip-nt of diplomatic and consular offices. Dozens of offices are using ordinary, unpainted, wooden kitchen tables for ks, and packing boxes for typewriter desks; books are placed on chairs to make them high enough to serve as chairs; the archives are packed in bundles for want of filing cases. In one country the legation has no safe in ch to keep the codes and valuable papers, and the consulate has no safe in which to keep the thousands of dollars ash paid in weekly as visé fees. This condition is true of several other missions.

here are outstanding requests for necessary furniture amounting to over $125,000. In addition to this, to equip offices to be established in central Europe will require at least $75,000, totaling over $200,000, to which must dded at least $20,000 for freight. The necessity for this equipment appears all the more reasonable when it is ized that the total revenue to be derived from the collection of consular fees alone for the current fiscal year is mated at nearly $9,000,000 which represents more than twice the total of expenditures for the entire service.

TRANSPORTATION OF DIPLOMATIC AND CONSULAR OFFICERS.

When this provision was originally enacted in its present form by the act of March 4, 1919, it was impractica to determine what amount would be necessary to defray the actual and necessary expenses of transporting diploma and consular officers and clerks, together with their families and effects, in going to and returning from their po under orders. Accordingly, the experimental sum of $145,000 was provided, but it was well understood in the hearin that this amount would prove inadequate and that subsequent appropriations under this heading would assu greater proportions. It has now been possible to reach a more accurate conception of the requirements in this rega as the experience of the past fiscal year showed that an expenditure of $270,000 was necessary. The past fiscal y may not be considered as an unusual one in the movement of diplomatic and consular officers and clerks. Owing increased costs of transportation, it is not possible to meet this charge with a smaller appropriation than the amou $300,000, asked for 1922.

INTERNATIONAL BUREAU FOR THE PUBLICATION OF CUSTOMS TARIFFS.

The quota of the Government of the United States for the year ending March 31, 1922, is four times that of p vious years, or $6,000. The necessity for the increase is explained as follows: The high cost of living made imperati a material advance in the compensation of the staff of the bureau. The rules in this respect adopted for the offici and employees of the Belgian ministry of foreign affairs, under which the International Bureau is placed, were m scrupulously applied to the staff of the bureau. These salary allowances to the staff, which, preceding the war, agg gated about 80,000 francs annually, have increased to a total of 139,534 francs. Certain of the officials who died resigned have not been replaced, the result being that the bureau is considerably undermanned. If the adheri States are to have their tariffs and supplements published accurately and promptly the force must be increased to full quota. Printing is another item in which there has been an enormous increase. Under the contracts in fo before the war, printing cost 688 francs per sheet. Successive advances in the cost of labor and material have carri it to the present high figure of 3,467 francs. Calls for proposals made with a view to reducing the cost of printing ha been futile. The cost of everything that is necessary for the conduct of the business of the bureau has increased p portionately.

The quota must be permanently increased, but it is now premature to fix the rate beyond the year ending March 3 1922. The increased quota requested is to cover the excess expenditures over receipts incurred by the Bureau duri the year ended March 31, 1920, and the estimated excess during the years ending March 31, 1921, and March 31, 192 The obligation of the United States to pay the quota now fixed is based on the convention of 1890.

INTERNATIONAL BOUNDARY COMMISSION, UNITED STATES AND MEXICO.

In a letter dated October 9, 1920, H. P. Corbin, consulting engineer, comments upon the conditions which ha hitherto militated against the successful operations of the commission, and the present favorable trend of events whi would appear to indicate a possibility of taking up the work of the boundary commission for the accomplishment the many tasks that are awaiting attention. In this connection, he points out the importance of a new bounda treaty between the two countries, as none of the treaties now in force provide methods of settling the many controversi questions which may be the cause of dissension.

The principal features to be pointed out in this connection are stated to be as follows:

First and of paramount consequence is the question of the division, diversion, and use of the water in the international streams for irrigatio None of the Mexican boundary treaties now in existence make any provision for the use of the water in the Rio Grande but for navigation, wi the exception of the section of the river that flows through the El Paso Valley; but in late years, water for irrigation has become the greate asset of the southwest. Treaty provision should specify in order the common uses to which water may be put; domestic use; sanitary purpos irrigation and for power.

The second question to be brought up for consideration is one that unquestionably demands treaty provision, and relates to improving bord conditions near the city of El Paso, Tex. At present, a tract of land belonging to Mexico lies well within the limits of this city, having be separated from Mexico by an artificial cut-off. For many reasons, this condition forms a serious meanace to the peace and well-being of the cit as criminals and wrongdoers find on this tract a ready refuge. On numerous occasions, bloodshed has occurred in the section adjacent to a including this area of Mexican land.

A similar condition exists a few miles below El Paso; here, a tract of American territory containing some 13,000 acres, which lies south of t town of Fabens was cut from Texas into Mexico by an avulsive change in the channel of the Rio Grande in 1856. In this case, the old riv bed, now almost obliterated and but dimly and inadequately marked, forms the boundary. This section has been the scene of much lawlessn and the lives of many people of both nationalities have been lost in troubles that have occurred there. It would seem to be particularly fort nate if a plan could be formulated by which an exchange of territory could be negotiated whereby the present bed of the Rio Grande could l made the boundary, or a safe and straight line agreed upon. The present condition renders it necessary to maintain a patrol constantly in th vicinity, and the military authorities have frequently sought relief in the matter. A treaty provision would remedy the situation. This s je was quite fully covered in three separate reports I made the commissioner on February 11, 1918, April 18, 1918, and April 20, 1918, respectiv .

A third important matter, which while not requiring treaty provision, urgently demands attention, is that of a complete topographical s v of the El Paso Valley. No survey of this valley has been approved by the commissioners since the Emory-Salazar Boundary Survey in 5 many years before the introduction of systematic irrigation and improved agricultural methods. During the long term of years th have elapsed since that survey, innumerable changes in the course of the river have caused disputes over property rights which can n be adjusted by any tribunal until the International Boundary Commission has established the nationality of the various tracts; in order that th may be done, a careful survey must be made of that section of the boundary where land is cultivated. This extends through the El Paso, t Candelaria, Presidio, and Mulato Valleys; Del Rio, Eagle Pass, and Laredo; on the Colorado River, between Lower California and Californ and Arizona. This latter section is rapidly increasing in agricultural value owing to the use of water diverted into the Imperial Valley in Cal fornia, and the Yuma Valley in Arizona.

Still another subject of importance is that of taking the measurements of the flow of the Colorado River, and of the Rio Grande from the poi where it becomes a part of the boundary between the United States and Mexico, a short distance above the city of El Paso, to the Gulf of Mexic a line which measures approximately 1,300 miles. If it should be that Mexico does not desire to cooperate with the United States in taking the measurements, I believe the United States should take it upon herself to do this work, in order to avoid future international complications, an to protect the proprty rights of her citizens along the rivers.

I have filled the position of consulting engineer on the International Boundary Commission for several years, and have made it a study t get down to the underlying conditions on which the work of the commission should be based and carried out. Up to the present time, I hav

no opportunity to confer with the State Department, or to testify before the Foreign Relations Committee as to the facts in the matter, ›ugh several reports have been written and handed to the commissioner.
I am familiar with border conditions and those relating to the duties and requirements of the International Boundary Commission, and respect- ask that I be called to Washington to appear before the Committee on Foreign Relations at the time the item of an appropriation for the rnational Boundary Commission is up for consideration.

INTERNATIONAL INSTITUTE OF AGRICULTURE.

The request for the increase shown in the estimates is occasioned by the conditions set forth in the letter of the retary of State to the Secretary of the Treasury, dated May 17, 1920 (H. R. No. 780, 66th Cong., 2d sess.), which be quoted in substance as follows:

The recent death of Mr. David Lubin, who since the creation of the institute had represented the United States on the permanent committee, reated a vacancy which as yet has not been filled. The task of finding a suitable successor with requisite ability, training, and experience ndered exceedingly difficult because of the fact that the salary available for that purpose is limited to $3,600 and no provision is made for ›ayment of the expenses of the delegate to Rome.
While the International Institute of Agriculture continued its operations during the war, I am told that it was greatly weakened both in per-el and funds, and that it is now operating with considerable difficulty. There seems to be an unusual opportunity at this time for the United s to acquire strong position in the institute which would be favorably received by a large number of the nations connected with it. An national organization for the systematic collection of statistics and other economic data relating to the agriculture of the world is unusually rtant under existing conditions, and the institute has done enough along these lines to show the value of such an organization and has thus the basis for much greater usefulness if it can be further developed along right lines. One great task which lies ahead of it is to encourage ›ring about, if possible, an effective and thorough organization for the systematic collection of agricultural statistics and other data in many tries which now have either no organization for such purposes or a weak one. It is believed that if the United States had a strong and capable sentative at the institute, and he should be provided with funds for the employment of the necessary assistance and for traveling expenses, ›uld not only aid in developing the institute itself but also the contributing institutions in the different countries.

A diligent search by both the Department of State and the Department of Agriculture for a man of requisite ›rt attainments and qualifications who would be willing to accept the post at a salary of $3,600 and pay his own ›el and miscellaneous expenses as well as the salary of a secretary has been futile. The increase and additions therefore again commended to the favorable consideration of Congress.

ARBITRATION OF OUTSTANDING PECUNIARY CLAIMS BETWEEN THE UNITED STATES AND GREAT BRITAIN.

This arbitration was actively engaged in the fiscal year 1913–14 in the discharge of duties committed to it er the treaty of August 18, 1910, with Great Britain, the expense for 1913 being $50,000 and for 1914, $66,627.57. re have been no regular sessions since August, 1914, when the outbreak of the war interrupted its proceedings and ed the adjournment of the sessions of the tribunal which were being convened in Paris at that time. Since 1915 appropriations under this heading have averaged about $4,750 per annum, being largely nominal and intended ›ly to provide for a skeleton organization to permit of the preservation of the archives and records and the handling ›rrespondence relating to arbitration matters.
Negotiations with the Government of Great Britain looking to the resumption of the active work of the arbitration ›ow in progress and it is believed that the two Governments at no distant date may agree to a resumption of the ‹ of the tribunal. The accompanying estimate for 1922 calls for an appropriation of $55,000, which amount is ›d upon previous expenditures with a slight increase for the pay of certain grades of legal and clerical help.

INTER-AMERICAN HIGH COMMISSION.

The title of the International High Commission, as established by the act of February 7, 1916, was changed by provisions of the act of June 4, 1920, to Inter-American High Commission.
The proposed work of the United States section of the commission to be performed during the fiscal year 1921–22 been arranged in accordance with the following topical plan:

a) The uniform law of negotiable instruments (including bills of exchange, checks, acceptances, bills of lading and warehouse receipts).
b) The convention concerning commercial travelers and their samples.
c) Uniform fiscal regulations, including administrative customs regulations and international freight transportation regulations.
d) Uniform fiscal regulations, particularly in relation to taxation.
e) The law of the American republics concerning the establishment of companies and the operation of foreign companies.
f) Uniform classification of merchandise.
g) The international trade-mark convention signed at Buenos Aires, August 20, 1910.
h) The copyright and patent conventions signed at Buenos Aires in 1910.
i) Communication problems, maritime, railroad, postal, telegraphic and radiotelegraphic.
j) The work of the permanent group committees.

The estimated increase of $5,000 over the appropriation for the current fiscal year is intended to cover necessary nditures for printing and binding, and the temporary employment of qualified research clerical assistants required he activities of the commission.

ERWAYS TREATY, UNITED STATES AND GREAT BRITAIN, INTERNATIONAL JOINT COMMISSION, UNITED STATES AND GREAT BRITAIN.

The salaries of the present force have been estimated at the rate which is now paid to the various members and loyees of the commission, no provision being made for the employment of additional expert assistants. It has ared necessary, however, to provide for temporary clerical assistance, principally stenographic, to the extent of 50 for each member of the commission, as well as for emergency temporary help of any character to meet the ›ncies of the work in the office of the secretary.

It is deemed impossible to estimate accurately the amount of each item that will be required for the commissi these amounts depending upon the number of cases brought to the commission by individuals, by either of the Gove ments of the United States and Canada, or jointly by both Governments. Manifestly, the number of such cases c not be foretold. The cost for reporting the hearings will depend largely upon the number of cases arising, the necess for hearings, and the number of witnesses appearing to testify. In the same manner travel expenses, transportat and subsistence will depend upon the activities of the commission, the extent of which can not be anticipated w accuracy.

The amount estimated for printing and binding is based upon past charges made by the Public Printer of t United States and by the King's printer in Canada, as applied to matter accumulated and in course of preparat to be included in the final records of the various cases, the printing of which it now appears must be deferred u the fiscal year for which the present estimate is made owing to demands for other purposes made upon the limit amount of the current appropriation.

The item for rent of offices is in excess of that of former years, and results from the general increase of rent in the District of Columbia. However, the commission has reduced by $900 per annum the amount that wou have been required at the increased rate for four rooms heretofore occupied, by relinquishing one of those roo and condensing its desks, files, and storage space into three rooms.

LEGATION BUILDING AND GROUNDS AT SAN SALVADOR.

In the act making appropriation for the Diplomatic and Consular Service for the fiscal year ended June 30, 19 $50,000 was provided for the erection in the city of Salvador on ground presented by the Government of Salva of a suitable building for legation purposes, said sum to include $10,000 for the purchase of the necessary furnitu for the building. Owing to the constantly increasing cost of all materials and labor, the most diligent effort to fi a responsible contractor who would undertake the construction of a suitable building, including the preparation the grounds, construction of driveways, sidewalks, fences, etc., at a cost within the $40,000 available, was witho result. Because of the ever-increasing cost of material and labor, as well as the great need of an adequate buildi to house the legation, it was highly desirable that the construction of a building be commenced with as little delay possible. Accordingly, a contract was finally made for the construction of a building which did not provide in stipulations for the preparation of the grounds. The building is now nearing completion. The cost of these outsi improvements, which are necessary to place the premises in presentable and habitable condition, has been conserv tively estimated by the department's representative on the ground at $11,000.

INTERNATIONAL RESEARCH COUNCIL.

The organization of the International Research Council, proposed by the delegates of our National Academy Sciences at an international conference held in London under the auspices of the Royal Society in October, 19 was initiated at Paris at the second international conference held under the auspices of the Paris Academy of Scienc in November of the same year, and formally completed at Brussels in July, 1919. The purposes of the Internatio Research Council are as follows:

(1) To coordinate international efforts in the different branches of science and its applications.
(2) To initiate the formation of international associations or unions deemed to be useful to the progress of science in accordance with Articl of the resolutions adopted at the Conference of London, October, 1918.
(3) To direct international scientific activity in subjects which do not fall within the purview of any existing international associations.
(4) To enter through the proper channels into relation with the governments of the countries adhering to the International Research Coun in order to promote investigations falling within the competence of the council.

Under the auspices of the International Research Council the following bodies, dealing with various branch of science, have already been established: International Astronomical Union, International Union of Geodesy a Geophysics, International Union of Pure and Applied Chemistry, and the International Union of Mathematics.

Participation of the United States in the International Union of Geodesy and Geophysics is designed to repla that in the International Geodetic Association and the International Seismological Association, both of which bod have now practically ceased to function. It is thought to be of very great importance that the United States shou associate itself actively with this extensive international scientific endeavor along those lines of such immedia interest and importance in the furtherance of science in this country.

INTERNATIONAL TRADE-MARK REGISTRATION BUREAU—QUOTA OF THE UNITED STATES.

The amount of $14,112, which was appropriated to pay the annual share of the United States for the expens of the maintenance of the International Trade-Mark Registration Bureau at Habana, is repeated in the prese estimates for the fiscal year 1922. Owing to delayed returns from the bureau it has been impracticable, up to t moment, to name the precise figure. The amount indicated, therefore, is a tentative figure and is subject to chan by the committee in conformity with data of a more precise nature to be presented in the course of the hearings.

INTERNATIONAL HYDROGRAPHIC BUREAU.

The request for an appropriation of $4,000, or so much thereof as may be necessary, to pay the first annu contribution of the United States toward the creation and maintenance of an international hydrographic bure is made at the instance of the Secretary of the Navy and the Secretary of Commerce, both of whom are in acco as to the great importance of having an international bureau of this nature. A general statement relating to th proposed bureau follows:

The International Hydrographic Conference, which was held in London from June 24 to July 16, 1919, and at ich delegates from 22 States were present, unanimously expressed the wish that an international hydrographic reau should be created as soon as possible.

The primary object of this establishment would be to institute a permanent liaison between the national hydro- phic offices of the world and to insure the continuity of the cordial association which has temporarily been so cessfully established by the London conference.

The conference was unanimous in recognizing that the creation of such a bureau would furnish immense ad- ıtages to all of the maritime powers, and especially in obtaining that uniformity in all hydrographic publications ich is so desirable to the seamen of all nations; its creation would also complete the successful results already ived from the conference itself.

At the present moment, when it is so necessary to push with the greatest possible activity all hydrographic work, ich contributes so largely to the economic development of the world, it appears most necessary to coordinate the rts of all hydrographic surveyors by establishing between them a permanent link, and this can not be carried except by an international bureau, as now proposed.

To attain this goal, with the least possible delay, the conference appointed a provisional committee composed hree of its members, viz:

(1) Rear Admiral Sir John F. Parry, K. C. B., hydrographer of the British Navy;
(2) Monsieur J. Renaud, Director du Service Hydrographique de la Marine Francaise;
(3) Capt. E. Simpson, hydrographer of the United States Navy;

gave them the mandate to take all necessary steps to obtain the creation of an international hydrographic bureau a permanent basis and fully to maintain its intended international status.

The committee has examined the question of cost so far as it is possible at the moment, and is of the opinion t the annual working expenses of the bureau may be estimated at a sum of at least 250,000 francs or £10,000 lue in gold); it is hoped that the cost would be equally divided between the States which sent delegates to the ference, and thus each would pay an annual subscription of about 12,500 francs or £500 (value in gold) and this re should be taken as representing the contribution which will be required from each State, in order to ensure creation and the subsequent working of the bureau. It is at the moment impossible to specify the expenses in ıil, as it is not yet known how many States will contribute; it appears to be a matter for further consideration ther it would not be better for the larger Maritime Powers to contribute a greater sum than that which would required of the other States.

It is desirable that each State which sent delegates to the conference should give its formal adhesion to the pro- al for the creation of an international hydrographic bureau, and an undertaking to pay an annual subscription, amount of which has been approximately estimated as shown above; when sufficient funds are assured to place project on a satisfactory footing the committee will take the necessary steps for the establishment of the bureau.

I share in the opinion of the Secretaries of the Navy and Commerce that the benefits to be derived from par- ıation in such an international organization are well worth the cost.

POST ALLOWANCE.

The present scale of consular salaries was established by the act of February 5, 1915. Legislation of a similar ure applying to the Diplomatic Service was not enacted until the current fiscal year 1920–21. At the present e the cost of living in all parts of the world has increased to such an extent that not only does the statutory ry fail to represent its former purchasing power, but the work of diplomatic and consular officers has grown in ortance to a degree not comparable with the functions which they performed before the war. This may be strated by the fact that at such posts as Naples, where in 1915, fees were formerly collected to the amount of 447.50, the estimated fees to be collected for the current fiscal year will reach $753,243; Palermo, which col- ed $16,522.32 in fees in 1915, is now collecting fees at the rate of $352,764 per annum; at Warsaw, there is an ease in fees from $6,174.50 in 1915 to $100,000 for the current year. In 1914 the American merchant marine ıged in foreign trade comprised 2,405 vessels with a gross tonnage of 1,076,152 tons. In 1920 it has grown to 8 vessels with a gross tonnage of 9,928,595 tons. Whereas before the war, the American flag on a vessel in a ign port was a rare object of curiosity, during the past fiscal year American consular officers performed services 25,868 American vessels calling at their ports. The growth of both diplomatic and consular duties in this re- l, within the past three years, may be judged from the fact that during the fiscal year 1917, 63 American vessels d at the port of Genoa as compared with 236 during the fiscal year 1920; at Kobe, Japan, 44 American vessels d in 1917, as against 257 in 1920. The number of American vessels now calling annually at Habana is 2,228; 'ampico, there were 1,454 during the past fiscal year, and it is expected that this figure will reach 3,000 for the ending June 30, 1921.

Given these enormous additional responsibilities and the unprecendented living conditions prevailing abroad, great disparity as regards salaries becomes striking. Since the establishment of the present scale of salaries the provision made by Congress to meet these new conditions has been in the form of post allowance, the total hich represents an increase of only 24 per cent over the prewar salaries which it is intended to supplement. s, while the cost of living has increased several hundred per cent, in many countries, and the duties and responsi- ies of officers in the foreign service have multiplied several fold, their rate of compensation has remained almost re it was when normal conditions prevailed.

It has been universally recognized that the Diplomatic and Consular Service is badly underpaid. The salaries hese officers, who are performing work of a most responsible character, are far less than such officers could com- d in private business. This fact is illustrated by the number of offers which are constantly being made to officers rivate firms, and the number of efficient men who, because of inadequate personal resources, have been forced,

much against their inclinations, to sever their relations with the service and form more remunerative connect in the business world. While the department does not propose, nor does it believe in principle, that these sal should compete with the rate of compensation offered in business operations, at the same time the exigencie diplomatic and consular work demand that our representatives abroad be men of exceptional ability and att ments, and the most efficient of these can not be held so long as the service fails to provide them with an appro standard of living.

As any change in the present salary scale would require an act of general legislation, I am making no re mendation to that end in connection with the present estimates. Post allowance has been the practical m adopted by Congress for adjusting the inadequate scale of compensation to the extraordinary living conditions ab resulting from the war, and I am, therefore, requesting that this allowance be increased for the next fiscal yea the amount of $200,000 as a remedial step in the correction of a grave discrepancy.

EXPENSES, PASSPORT CONTROL.

The system of passport control originally made its appearance as a war measure under the act of May 22, 1 the provisions of which will become inoperative with the termination of the state of war. By the passage of p act No. 79, which became a law on November 10, 1919, the system of passport control as a means of regulatin entry of aliens into the United States was perpetuated until March 4, 1921, the new act to take effect whe original act of May 22, 1918, ceased to be operative, that is, upon the return of a state of peace. The sum of $60 was appropriated for the above purpose, of which, $450,000 was made available until June 30, 1920, and the remai $150,000, with an additional sum of $250,000 made available by the Diplomatic and Consular act of June 4, has provided a total of $400,000 for the current year. The act under which the system is operating will cease t effective upon the termination of the state of war. Therefore an additional legislative enactment will be req at this session of Congress if the continuance of the system is desired.

The revenue derived from visé fees for the fiscal year 1920–21 is estimated at $7,000,000. The requiren for making this system of control thoroughly effective for the ensuing fiscal year are estimated at $1,000,000. U the ordinary work, and especially trade extension and trade reporting work, of the service is to be hopelessly en bered by a tremendous burden of routine labor, provision must be made for caring for these extensive new d quite independently, and it is to that end that the department has adjusted its present estimates.

I have the honor to be, sir,

Your obedient servant,

BAINBRIDGE COLBY

WAR DEPARTMENT,
Washington, October 15, 1920.

The SECRETARY OF THE TREASURY.

SIR: In compliance with the provisions of section 2 of the act approved July 11, 1890 (26 Stat., p. 268), I ha the honor to report for the information of Congress that with the exception of one clerk at $900 and one assist messenger at $720 per annum in the office of the Surgeon General, there are no employees in the War Departm below a fair standard of efficiency. The separation from the service of the two employees referred to, under provisions of the civil service retirement law, is contemplated at an early date.

2. In accordance with the requirements of section 7 of the act approved March 2, 1895 (28 Stat., p. 808), I h also to report that while, due to the lack of adequate clerical personnel, difficulty is experienced in the pron dispatch of the business of the department, its current work is practically up to date.

3. No employees appropriated for in one bureau or office have been detailed to another bureau or office more than a year.

Very respectfully,

W. R. WILLIAMS, *Acting Secretary of War.*

NAVY DEPARTMENT.

NAVY DEPARTMENT,
Washington, October 14, 1920.

'he SECRETARY OF THE TREASURY.

SIR: I have the honor to transmit herewith the annual estimates of appropriations required on account of the Navy Department for the fiscal year ending June 30, 1922.

In accordance with the requirements of section 7 of the act of March 2, 1895 (28 Stat., 808), I have to state hat the work of the department is in a fairly satisfactory state, with the exception of the Bureau of Navigation, hich reports that work in three of its major divisions, viz, Officer Personnel, Enlisted Personnel, and Mail and File)ivision, is in arrears, due primarily to the too radical cut made in the clerical force of the bureau July 1, 1920, and) the further fact that the Bureau of Navigation is a personnel bureau and that its work necessarily increases as the aval personnel, both active and retired, increases. On this account the bureau is asking for some 50 additional lerks for 1922.

In accordance with the requirements of section 2 of the act of July 11, 1890 (26 Stat., 268), I have to report hat my information is that there are no employees of this department below a fair standard of efficiency.

In accordance with the requirements of section 7 of the act of March 2, 1895 (28 Stat., 808), I have to report iat the following positions had, on June 30, 1920, been filled by detail for a period of more than one year, viz:

1 clerk of class 3 from the Bureau of Supplies and Accounts to the Secretary's Office.
1 clerk, at $1,000 from the Bureau of Supplies and Accounts to the Secretary's Office.
1 clerk of class 2 from the Solicitor's Office to the Secretary's Office.
1 clerk, at $840, from the Solicitor's Office to the Secretary's Office.
1 clerk of class 3 from Bureau of Engineering to the Secretary's Office.
1 clerk of class 2 from Secretary's Office to the Bureau of Supplies and Accounts.
1 messenger, at $840, from the Secretary's Office to the Judge Advocate General's Office.
1 clerk of class 1 from the Secretary's Office to the Judge Advocate General's Office.
1 clerk, at $900, from the Secretary's Office to the Solicitor's Office.
1 copyist, at $840, from the Bureau of Supplies and Accounts to Naval Records and Library.

Very respectfully,

JOSEPHUS DANIELS, *Secretary.*

The following bureaus, offices, and hospitals report that there are no employees therein who are below a fair standard of efficiency: Office of the Solicitor, General Land Office, Pension Office, Office of Indian Affairs, Bureau of Education, Geological Survey, Reclamation Service, Bureau of Mines, National Park Service, Office of Superintendent of Capitol Building and Grounds, Alaskan Engineering Commission, St. Elizabeths Hospital, Freedmen's Hospital.

Cordially yours,

S. G. HOPKINS, *Assistant Secretary.*

POST OFFICE DEPARTMENT.

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., October 14, 1920.

Hon. DAVID F. HOUSTON,
Secretary of the Treasury.

MY DEAR MR. HOUSTON: In accordance with the terms of the act of March 15, 1893, I have the honor to report that the work of the Post Office Department was approximately one week in arrears at the expiration of the quarter ended September 30, 1920.

You are further informed that, based on efficiency ratings, there are no employees of this department who are below a fair standard within the meaning of the act of July 11, 1890.

Yours, very truly,

S. A. BURLESON, *Postmaster General.*

DEPARTMENT OF AGRICULTURE.

DEPARTMENT OF AGRICULTURE,
Washington, October 15, 1920.

The SECRETARY OF THE TREASURY.

SIR: I have the honor to transmit herewith the estimates of appropriations for the fiscal year ending June 30, 1922. * * *

CONDITION OF BUSINESS.

The business of the mechanical shops is about 5 per cent in arrears, due to increase of work and a shifting force, which can not be kept at highest efficiency because of low salaries paid.

The drafting work of the section of illustrations of the Division of Publications is in arrears approximately two months, due to the inadequacy of the present force to handle the volume of work. The salaries which prevail in this section are not sufficiently large to attract high-class draftsmen, and consequently several positions have remained vacant a large part of the time. The natural growth of the department and its policy of issuing publications more attractively designed and illustrated than former issues has placed a heavy burden on this section. The photographic work of the same section also is about two months in arrears for the same reason.

The current cataloguing of the library of the department is also considerably in arrears, due to the difficulty of securing the services of qualified library assistants.

DETAIL OF EMPLOYEES.

No employees appropriated for in one bureau or office have been detailed to another bureau or office, except those whose details are specifically authorized by law.

MATERIAL FURNISHED NAVY AND ALASKA RAILWAY COMMISSION.

In accordance with the provisions of the act approved March 4, 1915 (38 Stat., 1100), requiring a report of the quantity and market value of earth, stone, and timber furnished from the national forests to the Navy, and for use in the construction of railways and other Government works in Alaska, you are advised that no earth, stone,

or timber was furnished from the national forests to the Navy Department for use of the Navy during the fiscal year ended June 30, 1920.

Timber to the extent of 4,122,470 board feet, having a market value of $6,381, was cut on the Chugach National Forest, Alaska, during the fiscal year ended June 30, 1920, for use in the construction of railways and other Government works in Alaska.

PROJECTS COMPLETED AND DISCONTINUED.

As required by the act of August 11, 1916 (39 Stat., 492), I have to report that the following investigations or projects conducted by the department during the fiscal year ended June 30, 1920, have been completed and discontinued:

1 clerk, at $1,000 per annum, from the Bureau of Naturalization to the office of the Secretary.

Referring to the provisions of the act of Congress approved March 2, 1895 (28 Stat., 808), I have to report that the ork of the department is not in arrears except in the Bureau of Naturalization, the Bureau of Labor Statistics, and he Bureau of Immigration. In the Bureau of Naturalization the arrearages on June 30, 1920, were as follows:

The work of the educational correspondence section of the division of citizenship training was approximately ine days in arrears. In addition to this there were 197 communities, representing many thousands of declarants, etitioners, and wives, for which it had not been possible to prepare educational report cards for the school authorities, or to address letters of invitation to the candidates and their wives urging them to attend the classes. The work f the industrial section of the division was five days in arrears. In the Bureau of Labor Statistics the current work s somewhat in arrears, due to the fact that the present force is inadequate to maintain the work current, and at the ame time meet pressing demands on the bureau for the tabulation of special information that must, because of urgent onditions, receive immediate attention. The Bureau of Immigration reports that its work is about three weeks n arrears owing to lack of experienced help and insufficient force.

Cordially, yours,

he assessor for the District of Columbia reports that: "The assessment amounts are those of the year 1919 and 1920; and in order to arrive at the basis of assessment, 50 per ill have to be added to the assessment amounts, which will give the full value used by the assessors. The assessment of improvements are based on the approximate cost buildings, allowing for some little depreciation, but have no relation to the present high price of building construction. The assessments on ground are based on the values ounding lots or parcels, with some allowance as to the advantage of the property being held in a large parcel."

Estimates for Chickamauga and Chattanooga National Park Commission. (*See p. 522.*)

WAR DEPARTMENT,
CHICKAMAUGA AND CHATTANOOGA NATIONAL PARK COMMISSION,
Chattanooga, Tenn., September 4, 1920.

Memorandum to accompany estimates for the fiscal year ending June 30, 1922, showing *increase* in estimates ove expenditures for the fiscal year 1920:

Item: Salaries.—During the fiscal year 1920 the designation of the superintendent at $2,400 per annum wa changed to superintendent and secretary, at $3,000 per annum.

NOTE.—This change took effect March 16, 1920, and accounts for the difference under this head in estimat for 1922 over expenditures in 1920.

Item: Transportation.—This item includes the purchase of a motor-propelled passenger-carrying vehicle t replace the worn-out machine which was purchased August 30, 1913.

The motor-propelled passenger-carrying vehicle is used by the chairman and by the superintendent and secre tary of the commission, who has direct charge of employees and the care of valuable property scattered over 5,73 acres of land in the Chickamauga and Chattanooga National Park and its various reservations. The park syste embraces 102 miles of improved roads, along many of which are valuable monuments, markers, and bridges. Th reservations included in the park are widely separated in the counties of Walker and Catoosa in the State of Georgi and Hamilton County, in the State of Tennessee. The efficiency of the service, not only in regard to the supervisio of employees, but the care of property, demands the use of a motor-propelled passenger-carrying vehicle.

APPENDIX L.

Estimates for Shiloh National Military Park. (*See p. 523.*)

WAR DEPARTMENT,
OFFICE OF THE SHILOH NATIONAL MILITARY PARK,
Pittsburg Landing, Tenn., September, 11, 1920.

From: Director, Shiloh National Military Park.
To: Chief of Finance, War Department, Washington, D. C.
Subject: Estimate of appropriation.

1. Complying with your request, this office transmits herewith estimate of appropriation for the Shiloh Nation Military Park for the fiscal year ending June 30, 1922.

2. Every possible economy has been observed in the preparation of this estimate.

3. Attention is respectfully called to the fact that the last commissioner of the park died on January 19, 192 that his death eliminated a salary item of $3,000 per annum, and that, on the 16th day of March, 1920, the secretar and superintendent was promoted to the office of director of the park, salary $4,000 per annum, this making a n decrease of $2,000 per annum in salaries of this office.

4. Increases of $300 per annum and $240 per annum respectively, are shown in the estimates for the clerk an the range rider as it is believed that such increases of salaries of these two employees would not more than place the on an equality with employees performing similar services in similar bureaus of the department.

5. The slight increase in labor item is made to meet necessary increases in wages of certain employees, alread granted by the department.

6. The only new item in the estimate is the hotel item, and this office must again ask the building of a mode hotel as an urgent necessity.

In this connection, attention is called to the fact that a hotel was a feature of the original plans of the Park, an that the building was destroyed by fire in 1913, since which time there has been no place to accommodate the man visitors desiring to remain for brief periods on the park.

DELONG RICE,
Director, Shiloh National Military Park.

APPENDIX N.

In connection with the estimates of the District of Columbia, as submitted by the Commissioners. (Estimates on p 883 to 971.)

COMMISSIONERS OF THE DISTRICT OF COLUMBIA,
EXECUTIVE OFFICE,
Washington, October 15, 1920.

To the SECRETARY OF THE TREASURY,
Washington, D. C.

SIR: The Commissioners of the District of Columbia transmit herewith, as required by law (31 Stat., 190 their estimate of appropriations to provide for the expenses of the government of the District of Columbia for t fiscal year to end June 30, 1922.

The District appropriation act for the fiscal year 1910, approved March 3, 1909, provided "Hereafter the Comm sioners of the District of Columbia shall not submit, nor shall the Secretary of the Treasury transmit to Congre regular annual estimates for expenses of the government of the District of Columbia for any fiscal year that sh exceed in the aggregate a sum equal to twice the amount of the total estimated revenues of the District of Columb for such fiscal year. Said estimates shall take into consideration and embrace all charges against the said revenu arising under appropriations other than the regular District of Columbia bill."

The estimated revenues of the District of Columbia for the fiscal year to end June 30, 1922, are $13,772,40 From these estimated revenues there must be deducted estimated expenditures for the extension of streets and avenu and for refunding taxes, which amount in aggregate to $90,000, leaving a net estimated revenue of $13,682,40 Twice this amount, or $27,364,800, therefore represents the maximum which the District estimates may not excee In the following table is shown the estimates submitted by Federal departments that are chargeable in part to Distri of Columbia funds and also the amounts (reduced in some cases) that were assumed by the commissioners in the prep ration of their budget. The table also includes an estimate for the payment of the bonus of $240 to District of Columb employees. Deducting this aggregate from $27,364,800 leaves $23,981,857 as the maximum which the estimat submitted by the commissioners may not exceed.

	Estimates as submitted to commissioners.	Estimates as reduced by commissioners.		Estimates as submitted to commissioners.	Estimates reduced b commissioners.
Connecting parkway between Rock Creek and Potomac Parks	$300,000.00	$300,000.00	Columbia Hospital for Women and Lying-in Asylum	$15,000.00	$15,000
Bridge across Potomac River at Georgetown	450,000.00	450,000.00	Salaries and expenses, Court of Appeals, District of Columbia	42,410.00	42,410
Improvement and care public grounds	928,550.00	600,000.00	Salaries, Supreme Court, District of Columbia	52,100.00	52,100
Salaries of employees, public buildings and grounds	152,433.00	152,433.00	Increase of compensation	1,600,000.00	1,600,000
Lighting public grounds	41,000.00	40,000.00			
Burial indigent soldiers	1,000.00	1,000.00	Total	3,723,493.00	3,382,943
National Zoological Park	138,000.00	130,000.00			

The estimates for the maintenance, operation, and extension of the water department are chargeable entirely t the water fund.

The aggregate of the estimates herewith submitted are as follows:

Chargeable to the general revenues	$23,956,414.99
Chargeable to the water fund	1,082,630.00
	25,039,044.99

In compiling their estimates, the commissioners were confronted with requests for increased appropriatio and added improvements which in the aggregate were far in excess of the amount which the commissioners are pe mitted by law to submit. These increases were due in part to the steadily increasing cost of material and supplie and in part to the fact that much necessary work of improvement was deferred during the three-year period beginnin with the entrance of the United States into the World War.

A very important feature of the estimates is the proposed increase in the salaries of the statutory employee This, the commissioners feel, should receive the fullest consideration if the efficiency of the organization is to b maintained and justice done to a large body of faithful and efficient employees. It is true that all the employees the District government, except those receiving in excess of $2,740, have had the benefit of the bonus during the pas year, but this bonus is not at all commensurate with the increased cost of living. In estimating increases in com pensation, the commissioners believe that they have been very conservative. They had before them the recommenda tion of the Reclassification Commission, requests of employees, together with the recommendations of the heads of th various departments of the District government. In practically every case the recommendation of the commissioner in the estimates submitted herewith will be found to be not only less than those asked for, but substantially less tha those recommended by the Reclassification Commission.

The commissioners have included very few new positions, in the belief that if the salaries of the present personnel re increased, the efficiency of the organization would be so improved that the need for added personnel would, to a ertain extent, be obviated. Some additional employees are asked for where the need seemed to be pressing, but s between increased salaries and increased personnel, the Commissioners hope that Congresss will agree with them iat an increase in salary of the present force is of primary importance.

The estimates submitted by the board of education were in excess of $10,000,000. To fit the needs of the schools ito a budget covering all District needs, and still keep within the authorized limit, made it necessary to decrease ie school estimates approximately $7,000,000. This amount, though 40 per cent in excess of the amount appro-riated for the current fiscal year, does not include many highly desirable and necessary building projects. While ie commissioners were forced to cut severely the school estimates, as well as those submitted for parks and play-rounds, they are in full accord with the board of education in believing that school facilities at the present time are inadequate as to call for extraordinary expenditures, notwithstanding the present high cost of building construc-on. This school construction work should be undertaken in a broad and comprehensive manner, and the cost iereof spread over a term of years by means of a bond issue or some equivalent method. Such a method of financing ay also be well applied to the proposed additions to playgrounds and the park system. These additions are all ghly desirable, and the land should be acquired before it is built upon, or devoted to other purposes. Delay in quiring it will result in ultimate increased cost and in losing portions which would properly be a part of the play-ound and park system. Already considerable areas designated in the McMillan plan as desirable park areas have en graded and converted into building sites, and many sites desirable for playgrounds are also being built up.

Pursuant to the requirement of law (34 Stat., 317), the Commissioners append hereto the estimates for the public hools for 1922 in the exact form and amount in which those estimates were submitted to them by the board of ucation.

The estimates of the commissioners covering items of appropriation under the Board of Charities are the same as ose submitted to the commissioners by the Board of Charities.

The commissioners also transmit herewith a copy of the estimate of the general revenues for the fiscal year 1922, statement showing the estimated general appropriation fund of the District of Columbia for the fiscal year ending ne 30, 1922, and a list of rented buildings.

The expenditures of the District of Columbia for the fiscal year to end June 30, 1921, are estimated at $20,554,-5.90, and for the fiscal year to end June 30, 1922, at $22,269,928.18.

Very respectfully,

BOARD OF COMMISSIONERS OF THE DISTRICT OF COLUMBIA,
By J. T. HENDRICK,
President.

For equipment, grading, and improving 6 additional school yards for the purposes of play of pupils, $2,400		2,400
NOTE (by the board of education).—This is a reinstatement of the item which has appeared for many years in the annual appropriation act. An appropriation was denied in the past two years owing, it is believed, to a misapprehension as to the real purpose for which the amount was requested.		
The board of education is hereby authorized to designate the months in which the 10 salary payments now required by law shall be made to teachers assigned to the work of instruction in nature study and school gardens.		
NOTE (by the board of education).—This is a new item and requests the giving to the board of education authority for action which will make it possible for the employment of teachers at a time in the year when their services as instructors in nature study and school gardens would be most valuable. By means of this provision the board of education would be enabled to grant to teachers held in service during the summer period a compensating amount of leave during the winter period.
